

## **First freedom?**

**Life, liberty, pursuit of happiness, freedom; ultimate ideals, but ask someone what their “first freedom” was, and you’re lucky if they really know what that is or even if there is a “first freedom” when a puzzled face returns, in answer to your question! Each one of us, intrinsic to our human existence, required our unique “conception” followed by nine days, nine weeks, nine months and then our birth(!) our very first freedom! Denied our birth, a God given freedom, and any other ideals would for us, have been meaningless!**

**To deny any unborn their birth, their “first freedom” is the radical pro-choice world view from conception to partial birth, sadly the result of a death-accepting-culture inspired by and is the legacy of the infamous Roe v. Wade decision in 1973! That radical world view would not stop at infanticide, if permitted, proving beyond doubt, the diabolical nature of the pro-choice (anti-life) ideology and countless non-accountable (legal) crimes against humanity, from conception through violent death! (One seventh of our true population is missing!)**

**Little wonder that the Abortionist-Democrat-Alliance has no concern about ultimate ideals but only abortion, climate change and nothing else! Choice cooperating with evil, always results in greater evil! Expect things to get worse not better, evil never rests and a death-accepting-culture is receiving exactly what it deserves.**

**So, choices have been made; a religious approach versus a world view approach, the faith-filled prayerful approach versus the deadly-violence approach, the love-life approach versus the anti-life approach! The first leads to everlasting life with the Lord, the latter, everlasting death without the Lord. So, a remaining few have publicly chosen to witness for life. (toofewwitnesses.com) Profoundly sad to observe, that many have viewed their witness with indifference or hostility! (Will the Lord find any faith on Earth when he returns? Truly the ultimate question.)**
