

23 May 2009: [Brookline: Brainless, Bloody or both](#)

The application for re-location of the abortionist in Brookline occasioned spirited, although "choice" leaning, debate at the board of appeals hearing. The root of the abortionist's appeal before the board is based on profit and has nothing to do with so-called women's health concerns. The abortionist, in half of these sinister procedures, deliberately and methodically destroys unborn women in their mother's womb. The helpless unborn woman's first right was to be born and without a birth she was denied all the rights which this abortionist claims for herself and those who support her. So much for the lie about abortion being connected to women's health care. For the abortionist, there is no love for women but there is money to be made. No woman's life is ever made better by abortion and those who champion this falsehood do an unconscionable disservice to a woman and to the noblest of vocations, motherhood. The second noblest vocation, fatherhood, is forever lost to the man who refuses to love his mate and the unique but helpless person that they did create.

Seven out of nine judges granted amnesty to abortionists in 1973 based on the premise that in the first trimester human life was some how absent. It was argued that the woman and her doctor (abortionist) should privately discuss and decide what should be done with the "inconvenient" question (third person), who would be totally unaware of their deliberations. Thirty six years later and we have 50 million unborn Americans destroyed at all stages of gestation, including at birth with no end in sight. We have become co-conspiratorial serial killers of our progeny. Two judges deferred in 1973, suggesting some semblance of sanity but the nation succumbed to the release from the responsibility of the innocent lives it created. A women's right to privacy has destroyed 25 million of their sisters-in-the-womb and the nation elected their champion. Every bumper sticker with his name represents a committed abortionist with no love for unborn women. America has hardened its heart along with the rest of the world to its great peril.

So history continues to unfold before our eyes. It is hard to believe that many years are left to record but let's assume that by some stroke of good fortune the unborn regain their God given rights in America before the Middle East finally implodes in one final cataclysmic Earth shattering event. Will history be kind to Brookline and say it was simply brainless in regards to innocent human lives lost in its community? Or will it say Brookline was absolutely bloody in its total disregard for innocent human lives lost for nothing more than simple profit?

History recorded that the board voted against unborn Brookline women on 21 May 2009.
