

Liberty Bell is ringing

The Liberty Bell began ringing in 1973 sounding the death knell for its beloved America. Once sacrosanct, American life in the womb was denied its' right to life, liberty and the pursuit of happiness! Unborn Americans became a commodity, a business opportunity for those who saw profit, a sacrificial offering for those who saw political advantage and a disposable creation for those too immature to shoulder life's responsibilities. Immediate gratification replaced seasoned foresight and violent spirits won a bleak victory. The future could have only one outcome. Denial of a right to life in the womb meant denial of every other moral right would naturally follow. The violent spirits continued their attack and America has been in moral free fall ever since. A ruthless industry quickly emerged, under the guise of "freedom" and "reproductive health", whose principal objective was the wholesale deadly destruction of Unborn Americans for profit. Those who could have reversed this slaughter and enacted law to save our Unborn refused to do so. They claimed a personal principled objection to the carnage and then claimed the right to abstain from action, thus not offending any one who did not have the same moral convictions that they professed to own. Hypocrisy from their own lips, thus becoming what they claimed not to be. Religious leaders have accepted this hypocrisy with resounding silence. Moral freefall continues and any moral opposition is labeled as "hatred". Violent spirits attack and silence all dissent with great success. How convenient for the violent spirits to have accommodating legislative support. So don't expect to see those in positions of power, representing "state" or "church", to be seen publicly attempting to save Unborn American lives. **The death knell is ringing and most if not all, are oblivious to its obvious and ominous import.** Thus America has become a moral derelict and a true land of **too few witnesses.**
