

# **Metastasized**

**In 1973, Evil and those who were, appealed to the United States Supreme Court for women's rights to abort their children, using the canard of their freedom to choose. They were not interested in their freedom, only the freedom to abort America's children, potentially, excessively profitable, but at the time, for the nation's unborn children, thankfully, illegal. The canard was successful, seven out of nine justices voted in favor, and Roe v. Wade became the law of the land. A cancer silently penetrated the soul of America and would become an indelible wound. The silence was deafening. Evil and those who were, rejoiced and quickly took advantage of their newfound liberty, the profitable violent destruction of healthy unborn American lives! The citizens took advantage of this newfound freedom, willing to accept, legally obvious it seemed, to be able to absolve themselves of responsibility for their unborn baby, using their own very personal circumstances as justification. While their own freedom to be born and act was jealously preserved, their child's freedom to be born was now legally meaningless! This was not lost on certain politicians. The party of slavery quickly became the party of abortion and for exceptionally good reason! If the citizens could accept the loss of the precious freedom to be born, of their own child, they could be deprived of their own freedom as well. Government imposed its malevolent will on the unborn, it could do the same for those born! That party became energized with a newfound vengeance, that never wavered, relentless in its pursuit of power and profit, even provided by the very citizens they were determined to make their new slaves! The party of freedom did little to counter their march toward political dominance in America and the citizens encouraged or watched or ignored their obvious evil success.**

**The party of abortion was dumbfounded in 2016 when Donald Trump became President of the United States. All establishment politicians, they quickly came to understand that this man was their mortal enemy, a man of no prior political experience. His life experience far outweighed their establishment experience, his being for America and its people, while they were historically and practically, not so much. They waged political war against him at every opportunity with every cause, real or imagined. President Trump continues to survive, much to their consternation and is truly a most fitting modern-day example of this found in the Old Testament:**

**Sirach 10:4 The Lord sees to the government of the world and brings the right person to power at the right time.**

President Trumps' unexpected elevation to the highest office of our land, bypassing all traditional political processes, could be viewed as more than providential. His mission, accomplished, one could unequivocally say, was to uncover the malignant cancer once and for all, expose it and those who encourage, promote and protect it, with such clarity that no one could deny its grip on Americas' soul.

The indelible wound has metastasized! The party of slavery has successfully subverted the "State", "Church", "Schools", "Media" and half the citizen population and has organized its final solution, (mostly peaceful) violent street demonstrations! Deadly legal violence in the womb sanctioned in 1973, has final metastasized to deadly violence in the streets of America. The party of abortion makes no apology, they root it on, it is what they stand for. What did the citizens expect would finally happen, encouraging violent crimes against humanity in 1973, against their own unborn children? Peace? **The party of deadly animosity for unborn Americans and America was always prepared to give it to them, deadly violence, for power and profit!**

Is Trump too little, too late for America? Is the cancer fatal, as many cancers are? Is he really standing for us all, all alone? God is with him. Are we?
