

Freedom to sleep!

**Freedom of speech can be a mighty powerful expression. Truly two views: those who are trying to save innocent lives and those who are indifferent to the loss of innocent lives. Perhaps it escapes those sleeping that the freedom they cherish so much results in their being blest with a birth and entrance into the United States of America. For the pro-choice feminists; without a birth there are no women's rights and 30,000,000+ unborn women have been denied their most basic God given rights. For the pro-choice male accomplice; 30,000,000+ unborn men have also been denied their most basic God given rights as well. There is no love for women in abortion and there is nothing civilized about any nation which exterminates its progeny in the womb. Pro-life folks (and lofty words) share equally in this heinous human rights violation because nothing legally has changed since 1973 to restore protection to the most defenseless among us. We are all guilty and the evolution toward total loss of freedom for all citizens has been steadily gaining prominence. Any government which denies life, liberty and the pursuit of happiness to any "inconvenient" unborn human life is fully capable of denying it to born human life it also deems "inconvenient." Have legislators been working with lofty actions for all our benefit for 45 years? Still can't see the obvious conclusion of that fatal decision in 1973? That self-inflicted wound was fatal, not just for our unborn but for us as well! The criminal champions of this campaign against life and liberty want you to keep sleeping..... Sleep well!
Frank K. Porter Jr.**
